CERTIFICATE OF ANALYSIS

Product Features

F F F HO	CAS No.	1478-61-1
	Product name	Bisphenol AF
	Appearance	White powder
	Purity(HPLC)	≥99.5%
	Molecular formula	$C_{15}H_{10}F_6O_2$
	Molecular weight	336.23
	Package	In Aluminum foil bag, cartons outside.
	Storage	Preserve in a well-closed container and keep in cool, dry place, avoid light.

Bisphenol AF dissolved in dilute alkali to generate the corresponding metal salts, nitration reaction, nitrosation reaction, Friedel-Crafts alkyl substitution reaction, halogenation reaction, carboxylation reaction, sterification reaction, can be polyphenol with acetone condensation, and excess formaldehyde in the alkaline medium to generate phenolics esters, and fatty alcohols, epoxy polymers, epichlorohydrin, and other condensation Condensation with fatty alcohols, epoxy polymers, epichlorohydrin, etc. to produce the corresponding ether.

Application

- ➤ Bisphenol AF is mainly used as vulcanizing agent (crosslinking agent) for fluoroelastomers, and more than 70% of fluoroelastomers are vulcanized with bisphenol AF.
- Bisphenol AF can also be used as a monomer synthesis of fluoropolyacyl (sub) amines, fluoropolyester, fluoropolyaryl ether, fluoropolyether ketone, fluoropolycarbon acid ester, fluorine epoxy resins, fluoropolyurethane, and other fluoropolymers, used as a gas separation membranes, proton exchange membranes, dielectric coatings, fiber optic sheaths, photovoltaic tubes, substrates, binders, etc., are widely used in microelectronics, fuel cells, optics, Bisphenol AF is widely used in microelectronics, fuel cells, optics, space technology and other fields.
- Bisphenol AF is often used as monomer of dyes or precursor of synthetic dyes, and can be used to synthesize fluorescent dyes, photosensitive dyes, optical brighteners, etc. It is also used in the field of electronics as raw material of organic light-emitting materials.

Company Profile

Heynova (Shanghai) New Material Technology co., Ltd. located in Shanghai is a technologically innovative company with integrated development of R&D, production and sales of high-end Electronic Materials and Specialty Polymer Materials. Meanwhile we are the agent of PI Resin, PI Engineering Plastics and 3D Printing materials.

- As technology R&D, the company has maintained close cooperation with a number of domestic research institutes for a long time, focusing on the design of the molecular structure of electronic materials, with a number of invention patents, the core formulations and processes independently controllable, with the ability to customize the development of the materials.
- As production and supply, our company has cooperative production bases in Shandong, Jiangsu, Sichuan and Northeast China, which can produce materials from gram to tonnage level, and has all the capabilities of small, medium and large-scale production.

Business Classification

- Polyimide Materials: Including PI Monomers, PI Resin, PI Engineering Plastics. PI monomers are mainly Dianhydride and Diamine special monomers, which have been widely used in the production of colorless and transparent Flexible Polyimide Films, Flexible Display Materials, 5G New Materials, Photosensitive Polyimide and Semiconductor Materials, New Energy Automobile Special Insulating Materials, Aerospace Composites, and many other high-tech field products.
- ▶ Photoresist Materials: Including Photoresist monomer, PAG, PAC, Photoinitiators, Solvents and so on. At present, our company's Photoresist Monomer is mainly based on KrF, ArF Gel monomer, focusing on the provision of Display Photoresist, Semiconductor Photoresist and special Photoresist materials for Semiconductors, Panels, PCB and other fields.
- > **OLED Display Materials:** Specialized in providing OLED Display Intermediate materials for cell phones, TVs, flat panels, wearable devices, in-vehicle devices and other fields.
- Lithium Battery Materials: Specialized in providing Lithium Battery Diaphragm materials for transportation, electric power storage, mobile communication, new energy storage, aerospace military and other fields.
- > 3D Printing Materials: Specialized in providing 3D Printing Organic Resin materials and high-end Metal materials for aerospace, marine, nuclear industry, medical and other fields.
- ➤ Customized services: We can customize the development of products according to customer needs, and continuously optimize the material properties and key indicators, developed in collaboration with customers, established the direct channel of "R & D Validation Mass production".
